

JEFX 02 Collaboration System Project Goals

- **We are looking for creative collaborative solutions for the AOC environment**
 - **Partial solutions are acceptable**
- **Provide access to a full range of collaborative services from the users' primary workstation**
- **Offer users a range of collaborative capabilities within their enclave together with accredited capabilities across the coalition boundary**
- **Assure interoperability with NetMeeting and SunForum at a minimum and with other collaborative tools and JEFX 02 baseline capabilities, (i.e. Livelink, TBMCS)**
- **Provide a user interface that is simple, easy to use and meets accepted industry and HCI standards (i.e. H323, single headset/audio control panel)**

Collaboration System Desired Services

- **E-mail with attachments**
- **Instant messaging**
- **Web resources**
- **Place based collaboration tools (with whiteboard, shared document storage, conferencing etc.)**
- **Integration with room-based systems (public address, wall displays, VTCs)**
- **Enhanced audio**
 - **Voice over IP**
 - **Single headset for all sources**
 - **Consolidated desktop audio control for all sources**
- **Compatibility with existing firewall policies and multicast aware infrastructure**
